

**What We Do**

**Data Cabling**

Category 5/6  
Fiber Optics  
Free Space Optics  
Wireless Bridging

**DATA CABLING INSTALLATION & MODIFICATIONS**

**NCS Data Systems** has established a superior reputation for successful installation, maintenance, modification and documentation of cable plants across various industries. We have maintained this reputation as a value-added partner with our clients by demonstrating our ability to integrate into the construction process and seamlessly work together with other vendors to deliver the greatest value.

**NCS Data Systems** has a proven track record of being available when its clients need it and getting the job done right the first time in less time than most of its competitors.

**NCS Data Systems** employs trained and tested technicians who have experience in a wide variety of working environments, from retail to rail yard, and its primary engineers have been seasoned in multiple industries. Its technicians and partners are continuously training on the latest testing and certification methods in the industry to maintain the highest level of competency for its clients.

**NCS Data Systems** has specialized in alternate communications and network bridging, including Cisco wireless bridging and access points in both 2.4 and 5 Mhz bands, along with free space optics, such as Light Pointe and Canon's Canobeam.

**NCS Data Systems** has supplied cabling services for high speed data circuit demark extensions for financial institutions and ATM systems, ground-up new store construction, raised floor data centers and retail storefronts.

**NCS Data Systems** has the ability to manage and solve all of your data cabling needs and will provide the testing data for all its work to document the results of your cable plant.

**NCS Data Systems** provides wired and wireless site surveys and has the installation experience to identify possible environmental, structural and interference problems, and recommend remedies to eliminate them.

**NCS Data Systems** has the solution for your data cabling and wireless survey, installations and service needs. Call today and discuss your needs with a highly experienced engineer.
